

## Sieur de la Roque Census of 1752

During the year of 1752, Joseph Sieur de la Roque was entrusted by the orders of M. le comte de Raymond, to prepare a census of France's Atlantic territories. La Roque began his work in the middle of winter and met many obstacles. His census, which is located in the Paris Archives, seems to have been prepared with care and attention to detail. It includes not only the full names of all the head of households, but also their ages, names and ages of their wives, names and ages of all their children, possessions, and places of birth. This type of information has proved to be invaluable to genealogical researchers, as after the expulsion by the British in 1758 (only 6 years following this census), vital records of the Acadian population were very scarce.

Listed below are the Samson families listed in La Roque's census. They are shown as residents of Port Toulouse, present day St. Peter's, Cape Breton, Nova Scotia.

The land on which they dwell belongs to Sr. Samson, their father-in-law, and he has given them land for building and to make a small garden where garden products do best. They have 2 cows and 6 fowls, and have been granted two years rations.
